Water capacity .....200 gal.  
Power.....2/1,800-hp DDC-MTU  
16V2000 diesel inboards

Following a series of highly acclaimed contemporary 65-footers, American Custom Yachts is introducing a new model, the ACY 65 Traditional sportfisherman.

The ACY 65 Traditional offers the same unique hull and outstanding fishability as the ACY 65 Contemporary, but with softer, flowing lines and a recessed bridge. The difference between the two designs is subtle and uncompromising, yet both are distinctly recognized as American Custom Yachts.

Inside, however, is a different story. Mesquite hardwood decks, warm wood veneers, and exquisite detailing convey the classic elegance of the 65 Traditional. As with every American Custom Yacht, the floorplan is a coordinated effort between the boat's owners, architect, and interior decorator.

Special details include recessed push-button hardware for all cabinets and drawers, pocket doors that slide back out of the way for the TV and microwave

cabinets, and an abundance of clever stowage areas. A push of a button opens the custom saloon air door with a special "safety close" feature preventing the door from accidentally shutting on a hand or foot.

In the cockpit, all hardware is recessed to prevent snagging clothing or tackle. This design also allows for easy cleanup after a long day on the water. The lockers on the saloon bulkhead feature removable cushions, providing the perfect seating for watching baits. A special detachable sun visor affixed to the

overhang allows crew members to keep a keen eye out, even with the blinding early-morning and late-afternoon sun. And when the temperature rises, the light covers on the underside of the overhang pull down, aiming cool air-conditioning at face level.

The ACY 65 Traditional is the first American Custom Yacht to utilize the new 1,800-hp DDC-MTU 16V2000 diesel engine.

This smooth and fuel-efficient powerplant, matched with the high performance characteristics synonymous with ACY's wave-slicing hulls, ensures a speedy and comfortable trip to the far-flung fishing grounds and a safe return with time to spare.

Classic elegance, unmatched comfort, outstanding fishability—the ACY 65 Traditional has it all.
