

HOW TO MAKE A GOOD BOAT EVEN BETTER

THIS MONTH

96 Tips for maintaining a healthy bow thruster.

104 Proper boat ventilation is good for your health and that of your boat.

108 Cruising with Capt. Creel

# BOATYARD

Power & Motoryacht readers use their boats a lot, and so time in the yard and on the hard must be well spent to be appreciated. We want to know about boatyards that are worth your time and worthy of your boat. If you have a favorite boatyard, please send an e-mail to [inbox@pmymag.com](mailto:inbox@pmymag.com) and tell us why your favorite yard is the best. Is it the time they take to explain their procedures? Is it the quiet confidence and competence of the craftsmen in the shop? Or is it the way they always seem to find the proper fix for that problem you just can't figure out. Whatever the reason, we'd like to know. This month our reader selection is American Custom Yachts, in Stuart, Florida.

Power & Motoryacht reader Bernard Nilles writes:

"There is simply nothing that they can't do well."
